## **SKILLS**

Strong expertise in robotics, dynamics, controls, and applied mathematics.

Computation: Comfortable in Linux and Windows environments. Software engineering (C++, Python) for robotics and simulation, with extensive use of version control and issue tracking. Proficiency in MATLAB for computation and data analysis. Experience with ROS, Qt, PCL, OpenGL, OpenCV.

Electronics: Circuit design/debugging, prototype PCB layout/fabrication, embedded systems.

Hardware: General machine shop rapid-prototyping skills, and proficient in CAD tools (Solidworks).

Languages: English (native), Spanish (fluent), French (proficient reading and writing).

Other: Private pilot, recording engineer, bassist.

### AWARDS

2007-2012 National Science Foundation Graduate Research Fellowship 2007 Stanford Graduate Fellowship 2007 John McCamey Award presented by ISA Tau Beta Pi and Phi Kappa Phi
